VICTOR MILL STARCH – The Weaver's Friend

THE HOME OF VICTOR MILL STARCH

Owing to the great demand for Victor Mill Starch for the past year we have been unable to make our usual prompt shipments and have had to decline some business.

We are pleased to announce to our friends that we are now in position to run our factory at capacity and can make prompt shipments and will be pleased to have their orders.

The usual prompt and courteous treatment assured.

NUMBER 21

Proposed Child Labor Laws

Since the Keating Child Labor Law was declared unconstitutional by the United States Supreme Court there have been a number of bills introduced in Congress with a view of accomplishing the same result.

Bill introduced by Congressman Mason provides:

"Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following shall be submitted to the legislatures of the several States as an amendment to the Constitution of the United States as provided in Article V of said Constitution:

"Sec.— That Congress shall have power to prohibit or regulate the employment of children under the age of sixteen years."

Bill introduced by Senator Kenyon provides:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That upon evidence satisfactory to him that any person or concern employs in a mine or quarry situated in the United States children under the age of 16 years, or employs in a mill, cannery, workshop, factory, or manufacturing establishment situated in the United States (a) children under the age of fourteen years; or

(b) children between the ages of 14 and 16 for more than eight hours in any day or for more than eight hours in any day or for more than six days in any week, or after the hour of 7 o'clock postmeridian, or before the hour of 6 o'clock ante-meridian, the postmaster general shall instruct the postmasters at any and every postoffice at which mail is received addressed to such persons or concerns to return to the postoffices at which they were originally mailed all letters and other matter so addressed with the words "Mail to this address undeliverable under child labor act, 1918," plainly written or stamped upon the outside thereof, and all such letters or other matter so returned to such postmasters, shall be by them returned to the senders thereof under such regulations as the postmaster general may prescribe.

Bill introduced by Senator Pomerene provides:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on all articles or commodities marketed after the first day of January, 1919, the product of any mine or quarry situated in the United States in the production of which children under the age of 16 years have been employed or permitted to work, and on all articles or commodities marketed after the first day of January, 1919, the product of any mill, cannery, workshop, factory, or manufacturing establishment situated in the United States in the production of which children under the age of fourteen years have been employed or permitted to work, or children between the ages of fourteen and sixteen years have been employed or permitted to work more than eight hours in any day or more than six days in any week, or after the hour of 7 o'clock postmeridian or before the hour of 6 o'clock ante-meridian, shall be subject to a tax equal to 25 per centum of the price at which such commodities are sold by the person, firm, corporation, or association employing such child labor in their production.

"Sec. 2. That every person, firm, corporation, or association employing child labor in the production of commodities as described in section one of this Act shall register with the collector of internal revenue of this district his name or the name under which he conducts business, and the place where such business is carried on; any failure to register as herein provided and required shall subject such person to a penalty of not more than \$10,000. Every such employer of child labor shall file with the collector of internal revenue of the district in which his place of business is located such notices, inventories, and bonds, shall keep such books and render such returns in relation to the business, shall put up such signs and affix such numbers to his place of business, and conduct his business under such surveillance of officers and agents as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may by regulation require."

Another bill introduced by Senator Pomerene provides:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That hereafter for all persons employed in any mine or quarry in the United States under the age of 16 years the employer shall pay to the United States \$2 per day for each day for each person so employed.

"For all persons employed in any mill, cannery, workshop, factory, or manufacturing establishment situated in the United States, under the age of 14 years, the employer shall pay to the United States of America \$2 per day for each day for each person so employed."

He Seized the Opportunity.

The mills who have been so free in paying transportation will read the following with interest:

"United States Deputy Marshal E. S. Williams went to Mayworth, Gaston county, N. C., where he arrested Arthur Crowder, a white man, and arraigned him before the United States commissioner at Gastonia on a charge of using the mails to defraud. It is charged that he had been making it his custom to write for employment to some cotton mill and have a check sent him by a prospective employer for transportation for himself and family—a wife and three children—and that he cashed the checks but did not go to work. The man was sent to the Gaston county jail in default of a bond of \$1,000 to await trial at federal court."

We have no sympathy for those whose money he kept. They were trying to rob other mills of labor and Arthur Crowder robbed them.

Engineers to Examine Price Lists.

A bill introduced by Senator Lenroot proposes to levy an additional tax of 5 per cent on the profits of any producer who uses child labor. This 5 per cent tax would be levied in addition to any other taxes which may be levied against the same taxpayer. The bill was proposed as a measure to raise revenue, and was, consequently sent to the finance committee for consideration. Coming at a time when the new big revenue bill is to be considered, it is not at all probable that the Lenroot proposition will be well thought of.

The extra tax for the use of child labor would be levied on the profits of "mines, quarries, mills, canneries, workshops, factories and manufacturing establishments."

Bill introduced by Congressman Mason:

"Be it enacted by the Senate and

Washington.—It is understood here that the war industries board has called in C. R. Makepeace of Providence, R. I., Albert Scott of Boston and J. E. Sirrine of Greenville, S. C., engineers, to go over the recommendations of the price-fixing committee of the cotton manufacturers, and to advise as to the figures submitted. The board wishes to have it determined to a certainty that the prices are on the same relative basis. The purpose of the government is to allow fair prices to everybody. There is to be no discrimination in fixing the cotton textile prices if the war industries board can prevent it.

Middle States Textile Manufacturers Association Convention.

Louisville, Ky.—The annual convention of the Middle States Textile Manufacturers Association, composed of textile manufacturers of Ohio, Indiana, Illinois, Missouri, Tennessee and Kentucky, ended without the adoption of regulations or resolutions. The meeting was more in the order of a round table discussion of conditions existing, and new problems following the war that face the manufacturer and jobber, and proved harmonious throughout.

The meeting was called to order by Vice-President Philip S. Tuley, who presided in the absence of President Paul Marrs, of Henderson, Ky.

Officers chosen were: President—Paul Marrs, of Henderson, of the Henderson Cotton Mills; vice-president, Philip S. Tuley, of the Louisville Cotton Mills; secretary-treasurer, Lee Rodman, of the Indiana Cotton Mills, Cannellton; directors, R. A. Cochran, C. A. Young, E. S. Hobbs and F. P. Toop.

Those present included: Phil Tuley, J. B. Young, C. A. Young, W. G. Young, J. J. Brown, Charles N. Brown, Mike Bettinger, Lee Rodman, Mr. Taylor, C. N. Poore, Tom Tuley, David Johnson, Charles Kramer, F. P. Toop, A. E. Dickman, Alex Semple, F. G. Eberhard, and Charles A. Wilder.

These committees were appointed:

Resolutions: W. G. Young, F. G. Eberhard, E. P. Toop and Lee Rodman.

Nominations: C. N. Brown, Chas. Kramer and M. Bettinger.

"Cotton and Cotton Rules," was the first matter taken up. The question of using 90 day acceptances in buying cotton was discussed, and it was the belief of several members that such acceptances would never come into general use.

The members were of the opinion that with traffic conditions unsettled, and many green men in mill and railroad offices, the car initial and number should show on all bill of lading and freight bills in order that receivers might be enabled to check up deliveries, and not pay for lots of cotton not delivered.

Members asserted that accidents in their section were much lighter than those shown from the East, due largely to the fact that the New England mills in many cases of years past.

are old, with machinery built before the days of safeguardings.

It was stated that in the Middle States the advance in wages over 1916 had been between 66 and 70 per cent, with an increase in living expenses of approximately 55 per cent. In the East it is reported that since 1914 labor has increased 87 per cent.

Government regulations of the textile mills, and of their output was discussed at length. It was the belief of members that about 60 per cent of the output of the textile mills would be needed by the government for some time, causing postponement of many commercial orders.

L. W. Buck Buys Interest in General Mill Supply Co., of Charlotte.

L. W. Buck, who has for several years been president of the Southern Dyestuff & Chemical Co., has sold his interest in that company and purchased half interest in the General Mill Supply Company, of Charlotte, which has previously been owned solely by Mac C. Thompson. Mr. Buck is well and favorably known to the mills of the South and prior to being in the dyestuff and chemical business was superintendent of some of the largest mills in the South.

Before organizing his present company, Mac Thompson was one of the best known paint salesmen in the South.

Both Mr. Buck and Mr. Thompson will engage actively in the business of the General Mill Supply Company and will travel. They will handle mill supplies, building supplies, dyestuff and chemicals and act as special representatives of a large number of firms.

Manager Defiance Sock Mills Enters Service.

Charlotte, N. C.—Morehead Jones, who has been in charge of the Defiance Sock Mills since the plant was established in Charlotte, left Wednesday for Charlottesville, where he enters the training camp under the auspices of the University of Virginia there. He goes into the motor mechanics branch of the service.

Mr. Jones is the principal owner of the Defiance Sock Mills and has been very successful in his management of the plant for a number of years past.

W. R. Taliaferro will be left in charge of the management of the mill. The superintendent and other officers of the company remain the same.

Gave His Life for His Country.

Mr. J. Monroe Teague, of Gastonia, received a telegram from the War Department informing him that his son, Marvin D. Teague, was killed in action on July 5th. Young Teague volunteered on April 24, 1917, and left for Fort Thomas, Ky., on April 25th. He joined the infantry. His father lives at the Avon Mill where he has held a position for the past several years. He was 18 years old.

Women as Mill Presidents.

Following the death of J. L. Rodman, as president and treasurer of

New Canning Outfit at Kannapolis.

Kannapolis, N. C.—The cannery furnished by the Cannon Manufacturing Company is now in operation in a neat building just erected for it. Mrs. Langford is the lady in charge and 15,000 cans have arrived. All fruit, etc., will be canned for the people at actual cost, and it will be largely patronized by all.

A Polite Retort.

Traffic Cop—"Come on! What's the matter with you?"

Truck-Driver—"I'm well, thanks, but me engine's dead!"—Ex.

BETTER PRODUCTION AND BETTER CLOTH

MONAGHAN MILLS
Monaghan Plant

Greenville, S. C., July 8, 1916.

Steel Heddle Mfg. Co.
Philadelphia, Pa.

Gentlemen:—

During my connection as Superintendent, formerly of the Greer Plant and now of the Monaghan Plant, I have used your "DUPLEX" FLAT STEEL HEDDLES on a large variety of fabrics ranging from two shades on 80x80 up to several harness on fancy weaves, and your heddles gave us better satisfaction than any other loom harness we could get.

NO THREAD EVER CUTS THROUGH YOUR HARNESS-EYE, which consequently means BETTER CLOTH AND BETTER PRODUCTION.

Yours very truly,

J. N. BADGER, Supt.

Because it means to the mills "BETTER PRODUCTION AND BETTER CLOTH", a larger variety of fabrics in cotton, silk, wool, jute and linen are woven with our FLAT STEEL HEDDLES than with any other type of Loom harness made.

We also make DROP WIRES and HARNESS FRAMES

The Peril of Socialism.

Like a leak in the dikes of Holland, which must be stopped at the beginning lest a rapidly widening breach let in a flood of overwhelming devastation, there is trickling through the buttresses of our constitutional democracy a thin but well defined constitutional socialism which threatens to overwhelm and destroy the very life of our nation.

The alarm has been sounded by watchers on the towers here and there, but the people as a whole have given as little heed, apparently, to the warnings sounded in our behalf as were given to the warnings of the perils that lay in bolshevism to Russia and the entire allied cause.

It is time the nation became alive to the socialistic, bolshevistic dangers that confront it. And it is time for serious thought and for definite and resolute action for defense and for safeguarding.

This war has not yet been won. Under God it will be won, although the way to the end is surely dark and bloody, and all the help that within us lies must be freely and fully yielded up before we can win. When saved from the present peril of destruction we must see to it that we have not permitted to fatten within our midst another peril as surely bearing the seeds of destruction as any that has overthrown the nations of the past.

The wages of sin is death. Sin is the transgression of the law. The law applies to nations as to men, and to escape the death the commandments must be kept by nations as by men. A thousand years are as but a day in His sight. God's law will rule throughout eternity. Unless this nation build squarely and securely on the eternal, fundamental rock of truth and right we may conquer the Boche, the Hun, today, and still in the coming years it may be written of us, "Lo, all thy pomp of yesterday is one with Ninevah and Tyre!"

The turning toward God by the men in the trenches and by the civilized nations of the earth has been a marvelous manifestation in this war. Righteousness never has had so strong a hold on mankind as it has today. This is something for covetous, self-seeking labor leaders and for weak-kneed and demagogic politicians to ponder over. It is something that should tremendously hearten and inspire the patriot

and the lover of truth and right. These it should stir to vigorous, united action now and as long as life shall last, that there may be made secure on these stones a nation whose ways are just ways, a nation exalted by righteousness, and thus a nation against which the gates of hell shall not prevail.—Manufacturers' Record.

July 4th at Necronsett Mills.

July 4th was a day of events with the people of the Necronsett Mills, Cumberland, N. C. First, they listened to an eloquent speech delivered at the village library by Hon. N. A. Sinclair of Fayetteville. Mr. Sinclair showed the people in glowing terms the condition of our country today; the great need of patriotism on the part of every one, in order to win the war in which our country is now involved.

He was followed by patriotic talks from Clifton Corley and Miss Elizabeth Gainey. Then came the serving of the barbecue and a general picnic dinner of good things. The entire concourse of people were bountifully fed. Then during an intermission visitors walked over the beautiful village viewing the well-kept yards and gardens. Prizes were awarded as follows for best gardens:

1st—A bed lounge to D. F. Guiton.
2nd—A mahogany rocker to Misses Daisy and Eva Smith.

3rd—A porch swing to Gentry Dees.

Athletic contests and moving picture shows followed.

Having a Good Time.

What constitutes recreation depends, of course, on the point of view. Here is that of a certain small citizen in a school for dependent children. He wrote to his father thus:

"We are having a good time here now. Mr. Jones broke his leg and can't work. We went on a picnic and it rained and we all got wet. Many children here are sick with mumps. Mr. Smith fell off of the wagon and broke his ribs, but he can work a little. The man that is digging the deep well whipped us boys with a buggy whip because we threw sand in his machine, and made black marks on it. Harry cut his finger badly. We are all very happy."—Ex.

Scientific Lubrication is cheapest—sometimes in first cost—always in ultimate cost.

For Comb Boxes on Cards S. F. Engineering Department recommends Slo Flo, No. 26

How Much Do You Lose a Year From Stained Stock?

OT down the amount, and along-side put down the difference in price between the lubricant you are now using and Slo-Flo, at say 10c a pound.

Slo-Flo

Then, consider that Slo-Flo is a lubricant scientifically designed to protect textile mill machinery and goods. It will save loss through

stained fabrics. It will save wear and tear on machinery. It will save something in labor costs, and—because it lasts much longer than ordinary lubricants, it will actually save money in lubricant costs, as well.

Make a trial, say, of Slo-Flo No. 26, for comb boxes on cards, and prove this for yourself.

Slo-Flo is made of highest grade materials. It is guaranteed to be uniform.

Let us send you one barrel, on a "satisfaction or money back" guarantee.

SCIENTIFIC LUBRICANTS for SCIENTIFIC LUBRICATION

Harry Dalton Over There.

Harry L. Dalton, formerly associate editor of the Southern Textile Bulletin, has landed safely in France. Mr. Dalton resigned last December to enter the motor mechanics division of the Aviation service and for several months recently was located at Camp Greene, Charlotte, N. C.

The following letter was written by Mr. Dalton just before his ship left for France and our readers will join with us in wishing his safe return when the job over there has been finished.

Dear Mr. Clark:

At last I am now on board ship. Naval terms are a little confusing I find. I asked one of the fellows where to find a certain fellow. He told me to go from "fore then midship" and I would find him on "aft." I haven't found (I might add) the fellow yet.

We had a rather uneventful trip from the camp where I saw you last with the exception of the numerous ovations which we received en route. Those ovations, while entirely undeserved by us, were greatly appreciated. They consisted of everything from factory whistles blowing, bells ringing, up to greetings from members of the "Northern Kissing Association," judging from their actions.

The mail facilities of my present location are not extra good. That is, they won't be. I will, therefore, have to be content with a small library of my own. The chief magazine in this library is one of the magazines of which you are editor.

I noticed congratulations are still pouring in by the hundreds congratulating you upon your successful fight for the State to regulate its own laws in regard to child labor. Allow me to, likewise add my congratulations again. No one except those associated in work with you can appreciate the untiring efforts you put forth—even when letters were coming in from others acknowledging defeat. I was talking recently on train with one of the most prominent lawyers of North Carolina. He said there was only one chance out of a thousand for the Supreme Court to reverse its decisions.

I wish to express appreciation again for the many courtesies extended to me and my comrades by you while I was "soldiering" in a nearby camp. Also, the work you were beginning to undertake as president of the Rotary club, for all the soldiers there, we appreciate these things more than we can express.

Hoping to see the same kind of sights that made Columbus so enthusiastic, once, very soon.

Harry Dalton,
Co. 20, 3rd M. M. Regt.,
American E. F.

Foch as a Bull Fighter.

Reading of Germany's advance, the ten or fifteen miles added to German territory in France, you ask, perhaps, "What are the Allies doing, what is Foch's plan?"

Foch is a Basque, and comes of a race that for centuries has had bull fighting for its chief athletic study.

He seems to be fighting the Prussian bull as his Basque ancestors fought and destroyed many a black bull in years gone by.

The bull fighter lets the bull make his rush and plants the sharp barbs in its flesh. The bull, tired, bleed-

ing, rests and attacks again. Again the bull fighter watches him, waits for him, torments and wounds him.

At last comes the final, fatal rush, when the sword of the matador goes through into the bull's heart.

And that is the last of that particular bull.

In Foch's methods you see bull fighting tactics, and are justified in the hope that before long the crowd will applaud and the dead bull be dragged out, bleeding, by the heels.—Arthur Brisbane Editorial.

Lineolton, N. C. — Thirty-six

acres of ground has been purchased two miles from the center of the town by Boger and Crawford, Philadelphia, mercerizers, for the erection of a cotton spinning mill. It will be operated by them under the name of the Boger & Crawford Spinning Mill. The main spinning mill to be erected will be brick slow-burning construction, 104x184 feet. They will erect a mill for 40,000 spindles and will install the machinery as rapidly as it may be secured, and at least 3,300 spindles will be delivered by the first of the year. Electric power will be used in operating the mill. The product for the present will consist of from 16s to 40s in combed peeler, and will be sold direct by them either in the gray or mercerized, at their plant in Philadelphia. The company has already received large Government contracts and the plant will be designed to facilitate the filling of these contracts. There will be a 500-foot railroad siding running into the mill, which will enable them to ship their products direct to their siding at the plant in Philadelphia without the usual handling and cartage, etc.

Buy Thrift Stamps.**The Kron Portable Cotton Bale Scale**

(Note brackets on side of platform for attaching incline.)

**Heavy Breaker Picker Bearings Won't Squeeze Out This Lubricant**

Beater and Fan Bearings of this machine are fast, heavy bearings that need perfect lubrication to avoid excessive use of power and undue wear and tear on the bearings.

should be used in these bearings. It will not run out and leave bearing dry like fluid oil.

NON-FLUID OIL lubricates when the journal revolves and does not need to be melted by frictional heat as does common grease. Much power is consumed in this way when melted grease runs out and wastes away like oil.

Make your own test; send for samples today and interesting descriptive matter.

“Conserve” the Resources of the United States

There is a Shortage of Cotton, Rubber and Labor

WHY WASTE 85 PER CENT. OF YOUR FIRE HOSE?

The Right Way

END VIEW BI-LATERAL HOSE FLATTENED

The Bi-Lateral construction absolutely prevents pin holes in the lining.

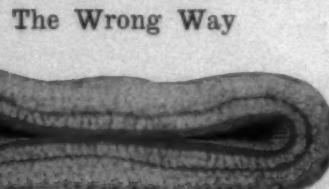

The rubber will never crack or leak, no matter how old the hose may be; it will last equal to the jacket.

Bi-Lateral construction makes it the one hose for motor apparatus.

The most flexible hose constructed; more can be carried in a limited space.

We accomplish by a simple mechanical construction what hose manufacturers have tried for forty years to secure by compounds & rubber, and failed.

End view of hose of old construction flattened which soon ruins the rubber lining at the point of fold, by causing the rubber to crease and crack, before the hose is one-third worn out.

BI-LATERAL FIRE HOSE WILL STOP THIS WASTE FOR YOU

“OUR PRODUCTS CARRY A SIX YEAR GUARANTY AGAINST LEAKS”

Florence Mills Award Garden Prizes.

Forest City, N. C.—The amount of prizes given by the Florence Mills for best gardens and premises are as follows: First prize, \$7.50; second prize, \$5; third prize, \$2.50; fourth prize, \$1.

The following named ladies were awarded prizes for cleanest premises: Mrs. I. S. Huggins, first prize; Mrs. George Wright, second; Mrs. N. H. Welch, third, and Mrs. Eulas Morrow, fourth.

For yards, Mrs. G. G. Frazier received first prize; Mrs. Mack Padgett, second; Mrs. Will Mask, third, and Mrs. George Hardin, fourth.

For gardens, R. L. Ferguson received first prize; R. V. Flack, second; Matt McDonald, third, and Mack Reid, fourth.

The judges found it quite a task to decide, as all the yards were prettily and tastefully arranged. The general appearance of the homes is one of neatness and cleanliness.

The gardens were more of a proposition to judge than anything else as every home in the village has an excellent garden.

The children have a fine garden at the community house and several dollars worth of beans have been gathered, sold and invested in thrift bath."—Ex.

stamps. The war garden children have the U. S. S. G. badges which they take great pride in wearing.

Accidentally Kills Sister-in-Law.

Fayetteville, N. C.—Mrs. Mary Nason was instantly killed and Malcolm Hamilton wounded in the head, by the accidental discharge of a shotgun in the hands of a young sister-in-law of Mrs. Nason, at the Nason home in the Holt-Williamson Mill community. The deplorable accident occurred as a party of young people were dispersing after taking a number of kodak pictures in which members of the party represented Red Cross nurses and other war characters, two of the young people holding guns in the picture. One of the guns was borrowed from a neighbor and was supposed to be unloaded until the Nason girl playfully pulled the trigger. The dead woman, who was about 50, leaves a husband and one grown son.

Only Thing He Wouldn't Take.

Subbubs—"I heard that your last servant was a regular thief."

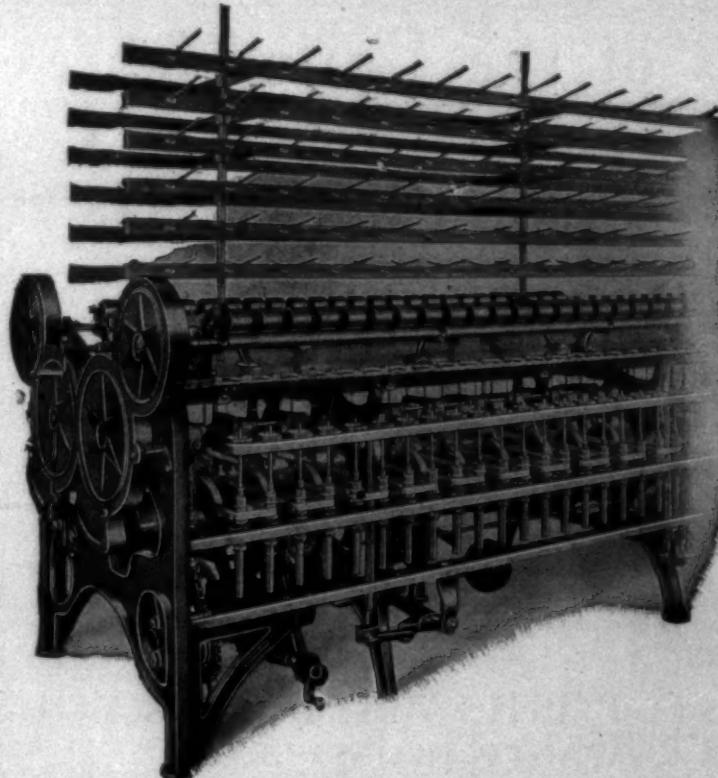

Hubbubbs—"Well, I wouldn't use so harsh a word, but I will say that the only thing we could leave around him with any safety was a bath."—Ex.

Conserve Your Fuel Supply this Year

The problem of fuel economy is of primary importance. If you can't save by using a cheaper coal—and operate your plant properly—the next best thing to do is to use less coal. It's a condition that confronts you now—not a theory. After the experiences of last winter you should be solving your fuel economy problem. The

Morehead Back to Boiler SYSTEM

will save you 8 to 20% of your fuel—1% of fuel for every 10 degrees of increase in heat. The Morehead returns all steam condensation direct to the boiler while it is hot—automatically—wastelessly—enabling you to keep your machines at 300 degrees F. The pure hot water it feeds to the boiler is used again with the least consumption of coal.

The Morehead eliminates sluggish circulation and operates steam heated machines at greater capacity. It handles condensation 95% cheaper and from 100 to 150% better than any steam pump can possibly handle it.

New Southern Office for Howell Motors

TO give better service to our friends in the South, we have appointed J. R. Purser, Southern Representative, with offices at Charlotte, N. C. You are invited to make this office your source of information on all matters pertaining to Polyphase Motors for textile mills.

HOWELL Polyphase Motors

are equipped with Patented Rotor Re-Centering Bearings. They are mechanically strong and rugged, are very efficient and have liberal overload capacities; they are long lived, inexpensive to maintain and will operate continuously with practically no attention, requiring only an occasional inspection of the oil reservoirs to see that they contain sufficient oil.

The policy of this company is to limit itself to the field of polyphase induction motors; thereby concentrating every effort to make one line of motors and to make that line absolutely the best that the highest engineering ability, together with skilled workmanship, and the best material can produce.

HOWELL Motors are wound for operation on 110-220-440 and 550 volts, two and three phase circuits of all commercial frequencies, and standard speeds.

Getting Back on the Payroll.

We were in Washington last week working to defeat the action of the War Labor Policies Board in adding the Keating Child Labor Bill provisions to all Government contracts.

At that time we were assured that the enforcement of the provisions would be left to the Army and Navy departments but expressed our disbelief, for we have always believed that the sole object of the movement was to get the cotton mill inspectors back upon the Government payroll.

The following appeared in the Washington Evening Star of last Saturday:

"Enforcement of the child labor clause, which the War Labor Policies Board last week agreed should be placed in all government contracts has been delegated to the Department of Labor, the board announces."

This means that the child labor inspectors after a brief absence from the payroll of Uncle Sam will be again "among those present" and when they come South clothed with their new authority there will be trouble ahead for the mills.

There is no patriotism connected with this movement, in fact it is unpatriotic because it will greatly reduce the production of Government supplies and every cotton mill in the South should refuse to accept

contracts containing the provisions of the Keating Bill.

Our mills are willing to make any sacrifice to help win the war but are not willing to have their production on war orders curtailed, for the sole purpose of letting a lot of old maids back upon the Government pay roll.

The Last Battle of the Marne.

The past week has witnessed what we believe will be the last battle of the Marne.

The first battle of the Marne, that is the first of the present war, was in September, 1914, when the French in desperation stopped the German hordes which had swept over northern France and threatened to take Paris.

In this battle of the Marne the Germans met a new foe in the boys from America and found that those whom they professed to despise were their masters.

While the press reports have exaggerated the gains made by the French and Americans the great fact remains that our men and the French not only stopped a drive for which the Germans had prepared for thirty days but drove them back across the Marne, leaving only dead or captured Germans, south of that river.

The dash and spirit of the American troops surprised the world and never was a more important time to bend every energy to get our sol-

the fight would be humorous if it were not for the fact that it was a France. time of death and horror.

It is said that one detachment of Americans fought their way so far in advance that an aeroplane had to be sent to tell them to fall back to the line.

On being asked what he thought of the tanks, an American soldier replied, "They are all right but you will have to rig them up some high gears if you expect them to keep up with us."

Probably the best illustration of American soldiers was the fact that when the entire crew of an American gun was killed by a German shell, a telephone crew who had been watching them from a nearby dugout, rushed to the gun and soon had it sending shells into the German territory, although they had never before fired a big gun.

The German soldiers are good fighters but they want their officers close at hand and are comparatively helpless when left alone.

The American soldier thinks for himself and learns quickly by observation and the death or absence of officers does not disturb the American boy because in his own mind he is as good as any officer and in an emergency he quickly takes the officer's place.

Ever since the beginning of the war the War Department has been combing out the dull minds, both among men and officers and those who have gone to France are quick thinkers and alert.

This battle of the Marne has shown Germany that America could train soldiers who were equal to her best and that the never-ending stream across the Atlantic will eventually give the balance of power to the Allies.

We are afraid that the press of America in causing our people to believe that this battle marks the nearing of the end of the war and that we will soon have peace when it is only an incident and even if the Soissons-Rheims salient is wiped out it will not seriously cripple the fighting power of Germany.

It is a long way to the Rhine, and considerably further distance to Berlin, and the way is blocked by the military machine of Germany with at least five million men. We know that Germany will be beaten in the end but the end is not yet and there are many high in Government authority who expect ten years more.

There is a danger that our people will believe the end is near, let up in their war activities when there

ply one round for Foch with most of the former rounds in favor of Germany. There will be other rounds before the knockout blow but the tide of the battle is turning our way.

Putting It Up to War Department.

The following interesting letter was written last week by W. D. Adams, secretary of American Cotton Manufacturers Association, to Major Rosenshon, councilor to the War Labor Policies Board:

July 18, 1918.

Major S. J. Rosenshon,
War Department, Room 490,
State, War and Navy Bldg.,
Washington, D. C.

My dear Sir:

Allow me to confirm my conversation with you this morning relative to the proposed labor clause to be inserted in all Government contracts, with special reference to the effect on our labor supply with Southern mills and maximum production of essential war materials.

At the outset, I need not reaffirm the most hearty desire on the part of our industry, as expressed through our Association, to co-operate with the Government in every possible way, to win the war. This co-operation is now being displayed by our committees that are in constant conference with the Price Fixing Committee, in stabilizing prices; with the Cotton Goods Sections of the War Industries Board, Quartermaster Corps of the War Department, etc., in procuring goods for the several branches of the Government, putting mills on Government work, etc. In addition, there are various other angles of contact where we are working to mutual advantage, space not permitting of detailed mention.

I know that you will agree with me that it is a manifest good policy in the present emergency that the Government and our industry—all industries—should work co-operatively and harmoniously together—nor should either assume, by reason of war conditions, to saddle upon the other conditions that otherwise could not be accomplished. This, I take it, is self evident. Furthermore, I bespeak from you the same spirit of conscientious patriotic service as I so cheerfully accord you in your position.

But returning to the immediate subject in hand, allow me to re-state, relative to the proposed labor clause in Government contracts, that such I deem unfair, and therefore most unwise and unfortunate, for the following reasons. I am writing from the viewpoint of Southern cotton mill conditions only, and while appreciating that the proposed reform is general, it must be special in so far as it touches our industry.

UNFAIR, because the insertion of

(Continued on page 16.)

Personal News

Fayette Brown has accepted position as overseer spinning at Globe Mills, Augusta, Ga.

Samuel Douglass has resigned as night carder at the L. H. Gilmer Mills of Millen, Ga.

John Bird has been promoted to superintendent of Lovera Cotton Mills, Trenton, Tenn.

J. T. Hull is now overseer of carding at Phenix Cotton Mills, Kings Mountain, N. C.

Jessie Madden has accepted position as overseer spinning at the Atlanta (Ga.) Woolen Mills.

Eli Kendrick has resigned as president and treasurer of the Lockmore Mills at York, S. C.

C. E. Beale, formerly of Uniontown, Ala., is now superintendent of Edenton (N. C.) Cotton Mills.

Z. G. Holtzclaw has resigned as overseer of carding at Jewel Cotton Mills, Thomasville, N. C.

E. B. McCarn, from Thomasville, N. C., is now superintendent Shaw Cotton Mills, Weldon, N. C.

C. A. Sweet has accepted the position of superintendent of the Beverly Cotton Mills, Middleton, Ga.

R. L. Carson has been made general overseer of carding at Jewel Cotton Mills, Thomasville, N. C.

L. A. Huggins, from Gastonia, N. C., has become second hand in spinning at Majestic Mill, Belmont, N. C.

Gordon Wilson has been promoted to superintendent of the Gloves Manufacturing Company, Juliette, Ga.

E. J. Sutton of Gaffney, S. C., has accepted the position of master mechanic at the Loray Mills, Gastonia, N. C.

T. T. Goings from Lexington, N. C., is now overseer of spinning at Jewel Cotton Mills, Thomasville, N. C.

Calvin Chandler, from Greer, S. C., has been appointed superintendent of Gaffney (S. C.) Manufacturing Company.

C. B. Armstrong of Gastonia, N. C., has been elected president and treasurer of the Lockmore Mills, York, S. C.

J. W. Thomas of Spartanburg, S. C., has accepted position as superintendent of the Norris Cotton Mills, Catawba, S. C.

Jeff Campbell has become superintendent of the plants of the Richmond Hosiery Mills at Soddy, Tenn., and Graysville, Tenn.

A. B. Brown has resigned as second hand in carding at Belmont, N. C., to accept position as overseer of carding, spinning and twisting at Henry River (N. C.) Manufacturing Company.

T. D. Miller has resigned as secretary and treasurer of the Statesville (N. C.) Cotton Mill.

F. B. Bunch, president of the Jewell Knitting Mills at Statesville, N. C., has been elected secretary and treasurer of the Statesville Cotton Mills.

F. E. Russell has been promoted from night superintendent to superintendent of the Canebrake Cotton Mills, Uniontown, Ala.

E. T. Whitten, from Porterdale, Ga., has been made overseer of spinning at Henderson Manufacturing Company, Hampton, Ga.

M. F. Harrington, from Albemarle, N. C., has been made superintendent of Johnston Manufacturing Company, North Charlotte, N. C.

J. A. Adams, formerly of Chester, S. C., has accepted the position of superintendent of the Hamilton Carhartt Mills No. 4, Mobile, Ala.

Nathaniel Macon of Henderson, N. C., has accepted position of assistant superintendent of Erwin Cotton Mills No. 1, West Durham, N. C.

G. H. Fairbanks, formerly superintendent of the Wallace Mills, Jonesville, S. C., has accepted a similar position at Fork Shoals, S. C.

B. H. Wilson, from Winnboro, has accepted position of overseer of spinning, spooling and warping at Marlboro Mills No. 3, McCall, S. C.

D. Ed Schumpert has resigned as paymaster for Mollohon Manufacturing Company, Newberry, S. C., after nearly 12 years continuous service.

J. A. Bennett has resigned as overseer spinning at Globe Mills, Augusta, Ga., and accepted similar position with the Enterprise Mills of same place.

R. E. Wilson, from Lawrenceville, Ga., has accepted position of overseer carding, spinning and winding at Whittier Mills Company, Chattahoochee, Ga.

Forrest Groves, son of L. F. Groves, the Gastonia mill man, had his left shoulder dislocated and received other bruises, when his automobile turned over, near Dallas, recently. Fay Lavendar, who was with young Groves, in the car was bruised considerably.

MILL NEWS ITEMS OF INTEREST

Raleigh, N. C.—The board of directors of Raleigh Cotton Mills have declared a semi-annual dividend of 10 per cent payable August 1.

Charlotte, N. C.—Fidelity Mfg. Co., it is reported, will shortly erect another building in which to install additional spinning machinery.

Eufaula, Ala.—Marcella Cotton Manufacturing Company has been incorporated with \$100,000 capital by H. A. White, A. C. Havens and Thomas Raby, Jr.

Lincolnton, N. C.—Midway Hosiery Mills have been incorporated with \$40,000 capital by O. F. Lackey, J. S. Carpenter, W. P. Beal and others.

New York, N. Y.—The American Bleached Goods Company have been appointed selling agents for Patterson Mills, Roanoke Rapids, N. C., and Courtenay Mfg. Co., Newry, S. C.

Charlotte, N. C.—Hoskins Mills are having all the tenement houses recovered and repainted which adds much to the appearance of the village.

Durham, N. C.—B. N. Duke has sold Durham Hosiery Mills a valuable piece of real estate on Ramseur street, Durham, on which, it is reported, that in the near future, the mills will erect another building to take care of their fast increasing business.

Charlotte, N. C.—The plant of Independence Chemical Co. has been leased to W. Gordon McCabe, of Charleston, S. C. It is planned to inaugurate operations at an early date for the production of sulphuric acid.

Great Falls, S. C.—Southern Power Co. has about completed its large switching station at Great Falls, which will be the largest station of the kind in the South if not in the United States. This station costs several hundred thousand dollars.

Avondale, N. C.—E. S. Draper of Charlotte, N. C., has been employed to lay out a 100-acre tract for the village of the Haynes Mill, which is being built at this place.

Shelby, N. C.—The annual meeting of the stockholders of the Shelby Cotton Mill was held last week at which time a substantial dividend was paid. The mill has had a very successful year under the present management and all former officers were elected as follows: G. C. Blanton, president; M. N. Hamrick, vice-president; J. C. Smith, secretary and treasurer. The board of directors is composed of the above named gentlemen and the following: J. J. McMurry, Marion Putnam, George Hoyle and R. T. LeGrand.

Titusville, Fla.—A company has just been organized by local business men and purchased the plant of Palmetto Products Co., and will manufacture palmetto rugs, cotton bagging, coarse burlap, sugar bags, grain and coffee bags, cement bags, binder twine and other products.

York, S. C.—On account of continued ill health Eli Kendrick has been forced to give up his position as president and treasurer of the Lockmore Mills at York. Col. C. B. Armstrong, of Gastonia, has been elected to succeed him in that position.

Roswell, Ga.—Richmond Hosiery Mills will increase capital from \$10,000 to \$50,000 and install additional new machinery. This increase of facilities is for the purpose of meeting a large contract for woolen hose which the company has obtained from the war department.

Chattanooga, Tenn.—William B. Davis, controlling several big hosiery knitting mills in the South, has received a contract from the Government for furnishing 500,000 dozen pairs of worsted hose. In order to meet this order he will establish a plant with daily capacity of 500-dozen pairs of worsted hose. A building has been secured and the machinery has been ordered.

Griffin, Ga.—The Kincaid Knitting Mills, which started the construction of a new mill in March, have now completed this building, installed the equipment and started operations. The building is 120x60 feet, and the machinery installed is understood to consist of 50 knitting machines. J. M. Thomas is president of the new company. Men's half hose are the product.

LaGrange, Ga.—Ellsworth & Co., who opened a silk mill here over a year ago, have closed down and will consolidate the machinery with the company's mills in the East. The principal reason for closing down, it is stated, is on account of the shortage and high cost of labor in this section, and the increased freight rates between this and Eastern points.

Mobile, Ala.—Hamilton Carhartt Cotton Mill Company, No. 4, has officially succeeded the Barker Cotton Mills with the filing of incorporation papers here. The company is incorporated at \$200,000. Hamilton Carhartt, W. G. Henderson and B. L. Ivey, of Rock Hill, S. C., were elected president, vice-president and secretary, respectively.

Greenville, S. C.—Okeh Manufacturing Company, recently mentioned among the new corporations, will build a mill to manufacture a certain grade of cotton yarn which the Government will purchase for a war purpose. It is now having the plans and specifications prepared by a Southern mill architect-engineer. The capitalization is \$75,000 and F. H. Cunningham is among the principal organizers of the new company.

Structural Strength is essential to permanent Security

Anchor Post Fences

"It's the design of the Post and the material in it that determines the strength and life of a fence. Now, with

ANCHOR POST FENCE of Chain Link Woven Steel

we make the arms that carry the barbed wire entanglement o pressed steel channels that cannot be bent down or broken off. There is no other construction that can compare with it for strength.

Then we make the posts of high carbon steel U-bars of large size and liberal section. Twenty-five years' experience has proven them to be the strongest and most durable.

Drive Anchors which hold the posts immovably erect are another exclusive feature that help to make an Anchor Post Fence the fence of greatest structural strength."

Putting It Up to War Department.

(Continued from Page 12.)
this clause in Government contracts only will result in a shifting of labor to non-Government work mills that will result in a serious shortage of labor to mills on Government work—a condition that the Government does not desire to see effected. This result is not to be doubted—as you, yourself, so readily discerned and agreed should not be tolerated.

UNWISE, because Southern mills now face a serious labor shortage, with the average of mills only getting between 75 to 80 per cent production. This labor cannot be recruited in a day or a month, but requires time to make efficient to the point where production is obtained. (It is my judgment that curtailing this supply of labor, however accomplished—with its resultant effect on production—will be most unwise.) And then too, consideration should be given to the fact that the next draft will take away an additional percentage of mill help—voluntary enlistments also, etc., thus further aggravating his general labor situation.

UNFORTUNATE, because, as stated, we are now engaged in a great enterprise where our aim should be, first and foremost, to win the war. To do this maximum production is essential. It would be most unfortunate to allow ourselves to be diverted in our major efforts by the injection of a labor difference, which might easily become a dispute.

In the afore-mentioned clause, the restriction complained of is not the fourteen-year age limit, night work, prison labor, or anything of that sort, but the provision prohibiting children between the ages of 14 and 16 years from working more than eight hours a day. And this restriction is objected to because its enforcement would upset the day standard. I believe you will agree with me that the amount of production secured from the additional two hours of work from the small number of children between the ages of 14 and 16 is relatively negligible. But the disarrangement, and upsetting of the standard work-day is of consequence.

But, digressing a little, I am frank to state to you that I believe the day is at hand when conditions of employment will be standardized. Allow me to add that no intelligent Southern manufacturer is a champion of child labor, per se. The citation from the Washington Times, in small print, herewith attached, is just as repugnant to me as it is to you, or any other right thinking citizen.

But we are, and have been, confronted with a condition—not a theory. The family has always been the unit of employment in the South. These families have come from the country, where the habit of work is inculcated from earliest childhood. These families are native, pure blood Anglo-Saxons, strong, husky, forward-thinking and independent folk. The work in the mills is easy, children at the spinning frames and picker room, have to give only one-half to one-third of their attention to the work

in hand. It is easier and less tiring than any other work they know of. Then why should they not work?—this is the question asked by the father of his boys. "Suppose they don't work, then what are they going to do?" This is the second question. "If they loaf and play about the mill, how am I to know but they will get into mischief?" This is another thought that occurs. You see the drift.

As manufacturers, who are just as much concerned about their future labor as you are—or more so—the mill men are seeking to perfect the substitute that will afford children not working in the mills, suitable and profitable employment of their time in schools. Hence the development of mill schools, garden work, manual training, etc. I heard Prof. P. P. Claxton, U. S. Commissioner of Education, state recently that one of the great troubles with the ordinary public schools in the South was the securing of good teachers because the mills were hiring so many of them. Commissioner Claxton does not believe in child labor, nor do we, but he has the Southern mill man's viewpoint as well as the other.

I repeat with all emphasis that nothing would give me greater genuine satisfaction than to assist in working out a satisfactory basis of this great problem—one that would be practical and meet all the conditions imposed by circumstances. This, however, to be effective must have the backing of a healthy public sentiment, and should be worked out by conference of the interested parties along with some fair, able, and disinterested arbiter—the Government for instance. One party cannot undertake to say what the solution shall be. Furthermore, any solution should be given the most careful and mature consideration as to what the consequences will be.

All this may sound elementary—it is elementary—but it is well to keep it before us.

From the foregoing, it is manifest that my judgment, as expressed to you this morning, is that it would be unwise to undertake to enforce the proposed labor clause in Government contracts, without due regard of the consequences.

I believe that you concurred with me in this conclusion, and suggested that the same should be made general—so as to apply to all work, whether for the Government or civilian business. This you proposed to see done by compelling mills on civilian work to comply with the standards by holding over their heads refusal of coal, priorities in transportation, etc.

This recourse, my dear Major Rosensohn, in my humble judgment, calls for the most careful consideration.

Is it practical? Can it be successfully carried out? And then admitting that such can be done, will the result achieved, justify the effort expended?

Your experience and information on this point is vastly better than my own, but as a practical proposition, I am in doubt about it. However, I believe that I am open to conviction. Many I not, therefore,

Cotton Goods

New York.—The cotton goods market has been quiet during the past week as trading was begun on the lower basis of fixed prices.

There was very little of interest in the gray goods market. This, however, was not due to any lack of orders, but rather to the general difficulty of getting goods. Throughout the week, there has been orders in the market for considerable quantities of all kinds of print cloth, sheetings and other constructions, and, while a fair business was averaged for the period, there were lots of orders that remained unfilled. This much appeared to be true—that, wherever cloth was offered at the government price, it was disposed of very quickly. However, on the whole, buyers were unwilling to consider any propositions unless they were at the fixed price, or, at least unless a clause providing for "government price revision" was inserted. There were many who would not consider this on the odd constructions, preferring to wait until the particular prices were named by Washington.

One of the important features of the week's trading, was the fact that quite some goods were sold for delivery into the last quarter of the year, giving the impression that the dividing of the year into four price fixing periods of three months each, would not have the effect of restricting contracts to the particular periods during which the sales were made.

The announcement of prices on many odd styles of gray goods and sheetings, and many finished lines has not yet been made and the trade is moving very cautiously until the new plans are better understood. The jobbers of the country have appointed a committee that is now at work on plans to harmonize the primary market reductions with prices to be charged for distribution when the new and lower priced goods begin to come to hand.

It may be some time before the effect of the new price basis is passed on to retailers, but the latter have not been charged on the very high basis reached in primary channels during the past five months. The upward and inflated movement is at least checked and for the time being trade is checked.

Production is still greatly hampered and curtailed. Wash fabric buyers have begun to make selections for the coming spring and in some instances prices have been named on goods that were in stock in the gray before the price fixing plan went into effect.

Market quotations were firm as follows:

Print Cloths

	Print Cloth	Fixed Govt. Price Basis	Market Price Basis

The Yarn Market

Philadelphia.—The patiently awaited announcement of government prices is causing cotton yarn men to wonder how it will affect the market. Suggestions made by the spinner's representatives are now in the hands of the price-fixing committee and it is hoped that the announcement will be forthcoming soon but no intimation has been reached as to when the announcement will be made.

In the meantime the yarn market is absolutely "nothing doing" in so far as business is concerned. Spinners refuse to quote or accept business on a conditional basis subject to revision. Dealers claim that this position is absurd as all sales must be affected by the new price basis. Dealers say there is no use trying to get business in any other way, but the spinners are inclined to wait and see for themselves. Inquiries point to a very busy market as soon as prices are fixed. Many manufacturers are anxious to buy and are needing the yarn.

Since the recent meetings at Charlotte and Macon considerable comment has been heard on the prices reported as suggested. Nothing definite has been heard as to prices suggested but it is generally believed that these prices are generous enough. Terms of sale and non-payment of freight as proposed have caused considerable criticism by some dealers.

Prices are holding firmly to current levels established before the inactive period developed. There is said to be quite a demand for weaving yarns, but there are not many to be found in stock. Among recent sales noted are 20s two-ply warps at 76c; 30s two-ply skeins at 81c; 40s two-ply warps at 94c; 50s two-ply at \$1.03; 10s frame spun at 63c; 14s cones for July delivery at 63c.

Below are first hand spinners' prices governing sales at time War Industries Board conferred on the subject of quotations:

PERSONAL

George W. Moore, night watchman at Dunson Mills, LaGrange, Ga., was accidentally shot and killed one night last week. The accident was caused by his stooping to turn off a pipe, when his pistol fell from the holster, striking the pipe, exploding and killing him instantly. His wife, three sons and five daughters survive.

J. C. Ellis, a director in the Abbeville (S. C.) Cotton Mills and cotton buyer for that corporation, died last week.

D. H. Hill, Jr., Promoted to Second Lieutenant.

D. H. Hill, Jr., formerly associate editor of the Southern Textile Bulletin has been promoted from sergeant to second lieutenant and is now stationed at Camp Lee, Petersburg, Va.

On account of his small stature Mr. Hill failed to secure his commission from the second officers' training camp but succeeded in getting in the third camp and was passed but sent to the Sixth Division as a temporary sergeant. His commission as second lieutenant was received two weeks ago and we expect to see him go much higher before the war is over.

Mills Closed for Our Day.

On Wednesday morning all the cotton mills in the Piedmont section depending upon the Southern Power Company for power ceased operations for 24 hours.

There are about 450 mills depending upon this company for power

with about four million spindles and the accompanying number of looms. Thousands of employees took an enforced holiday. Low water in the streams was the cause.

C. L. Williams Erecting Looms in Peru.

J. M. Williams, our traveling representative, has received a letter from his brother, C. L. Williams, stating that he is installing Draper looms in the Inca Cotton Mill, Lima, Peru. Mr. Williams states that after finishing his work in Peru, he is also to install Draper looms in Ecuador and Brazil. He traveled 4,000 miles to reach Peru.

Wounded in France.

Robert Hines, who was recently reported in the American army casualty list as having been seriously wounded and his home address was given as Greenville, Ga., is from Greenville, S. C., having formerly resided at Woodside Mill. He enlisted in the regular army in the early part of 1917. There's a star in the Woodside Mill service flag for Hines.

New Humidifier Patents.

F. F. Bahnsen of Winston-Salem, N. C., has received letters of patent on a centrifugal type humidifier which he claims embodies a new principle. Mr. Bahnsen says it is a most efficient machine. It has a great evaporating capacity, and an absolutely accurate automatic control. A new company known as the Bahnsen Humidifier Company, has been organized to manufacture the machine in Winston-Salem.

Broken or Worn Card Room Spindles Repaired and Made Like New

Spindles re-topped or re-verses—New part welded on Electrically. All bearings made full size. Spindles Guaranteed not to break at weld.

TRY "FIBRELAY" SIZING COMPOUND

and eliminate your sizing troubles.
Especially recommended where
warp stop motions are used.

HAWLEY'S LABORATORIES, Inc.
CHARLOTTE, N. C.

SOLUBLE TALLOW

A pure tallow scientifically rendered soluble. A superior product to natural tallow. It will flow at ordinary temperatures, is antiseptically treated, and will not decompose or turn rancid. Will not impart a "sour" or disagreeable odor to the fabric, as will naturally beef tallow.

Barber Manufacturing Co., Lowell, Mass.
SPINNING TAPE SPECIALISTS

Anti-Ballooning and Furtardo Thread Guides

These thread guides prevent excessive ballooning and decrease breakage of ends on spinning frame. They decrease the work of spinners and enable each spinner to run more sides.

J. P. O'CONNELL

Crompton, - - - - Rhode Island

VARNISH FIGHTS OIL

WHILE the spinning frames run, oil works from the stands and cap bars into the ends of the leather rolls. Oil hardens and cracks the leather and the roll have to be recovered. You know what roll covering costs today. DUREX TOP ROLL VARNISH fights the oil by making the leather oil proof and also increasing its spinning qualities.

Employment Bureau

The fee for joining our employment bureau for three months is \$2.00 which will also cover the cost of carrying a small advertisement for one month.

If the applicant is a subscriber to the Southern Textile Bulletin and his subscription is paid up to the date of his joining the employment bureau the above fee is only \$1.00.

During the three months membership we send the applicant notices of all vacancies in the position which he desires.

We do not guarantee to place every man who joins our employment bureau, but we do give them the best service of any employment bureau connected with the Southern textile industry.

WANT position as superintendent or overseer of weaving. Have had long experience as designer-overseer of weaving, and assistant superintendent. Am now employed and giving satisfaction, but prefer to change. Can give first class references. Address No. 2181.

WANT position as superintendent of either yarn or plain weaving mill or as carder and spinner. Am now employed and giving satisfaction and have had long experience on both carding and spinning. Good references. Address No. 2182.

WANT position as superintendent. Am now employed and giving satisfaction but for good reasons wish to change. Experience on both yarn and cloth mills. Address No. 2185.

WANT position as overseer of carding and spinning or both or superintendent of small yarn mill. Have had long experience in all positions and can furnish high class references. Address No. 2186.

WANT position as superintendent. Have held position as superintendent of one of the largest mills in South Carolina and have had long practical experience in all departments. Can furnish high class references. Address No. 2187.

WANT position as overseer of carding. Have had long practical experience and can furnish best of references from present and past employers. Address No. 2188.

WANT position as superintendent or as carder and spinner. Am an all around man and can successfully fill any position in cotton mill. Have had special experience on carding and can give satisfactory recommendations as to character and ability. Address No. 2189.

WANT position as overseer of plain weaving. Now employed as night overseer of weaving, but wish to change to day work. Married, 32 years of age and am giving satis-

faction on present job. First class references from past and present employers. Address No. 2190.

WANT position as superintendent or overseer of carding. Now employed as superintendent of small mill but for good reasons desire to change. Best of references from former employers. Address No. 2192.

WANT position as overseer of large card room. Am at present employed but would like to make a change; 16 years in mill work, 6 years as carder and 4 years on present position. Experienced on fine and coarse yarns and both colored and white. Address No. 2193.

WANT position as superintendent or overseer of weaving. Have had long practical experience both on white and colored goods and have also had experience in silk mills. Am now employed as assistant superintendent. High class references. Address No. 2194.

WANT position as superintendent of yarn mill or plain weaving mill. Can furnish A-1 references from present and past employers. Held position of superintendent and spinner for 6 years. No cause for changing except desire larger salary. Address No. 2195.

WANT position as superintendent. Am familiar with manufacture of ginghams and other kinds of cloth and yarns including hosiery yarns. Have always made good and can furnish high class references. Address No. 2196.

WANT position as overseer in large card room that will pay not less than \$5.00 per day. Now employed as carder and spinner and giving satisfaction, but desire to change. First class references. Address No. 2197.

WANT position as superintendent or overseer of large card room. Now employed and giving satisfaction but prefer to change. Good references. Address No. 2198.

WANT position as superintendent. Have had 16 years mill experience with 8 years as superintendent. Age 36, married, strictly sober, best of health and can give good hard service. Fine references. Address No. 2199.

WANT position as superintendent. Have had long practical experience as superintendent of both yarn and weaving mills and giving satisfaction on present job but desire to change for larger position. High class references. Address No. 2200.

WANT position as overseer of carding or carding and spinning. Have 26 years' experience as carding and spinning and 5 years as overseer. Experienced on combed yarns. Best references. Address No. 2201.

WANT position as superintendent. Have had long practical experience and can furnish best of references from presidents to superintendents for whom I worked in years past. Address No. 2202.

WANT position as superintendent, assistant superintendent or overseer of weaving. Have had long practical experience on both plain and fancy goods and can furnish high class references from present and former employers. Address No. 2203.

WANT position as overseer of weaving. Am experienced on Draper, plain and fancy looms and can furnish high class references from former employers. Address No. 2204.

WANT position as superintendent. Have had several years' experience as superintendent and was formerly overseer of carding and combing. Have special experience on combed yarns and can furnish very high references. Address No. 2205.

WANT position as overseer of spinning. Experienced on both fine and coarse yarns. Now employed but wish to change for good reasons. Satisfactory references. Address No. 2206.

WANT position as overseer of carding or as carder and spinner. Now employed in fine yarn mill but have also had experience on coarse yarns and can furnish high class references. Address No. 2207.

WANT position as overseer of spinning. Experienced on coarse and fine yarns, with special experience on fine combed yarns. High class references from present and former employers. Address No. 2208.

WANT position as superintendent or overseer of carding and spinning. Am at present employed and have several years experience as overseer of carding and one year as superintendent. Can furnish satisfactory references and have good reason for wanting to change. Age 34, married and have family. Address No. 2209.

WANT position as superintendent or overseer of weaving and designing in large mill. Have had long practical experience and am at present employed. Address No. 2210.

WANT position as superintendent or as carder and spinner. Have had experience in both positions and can furnish high class references. Address No. 2211.

WANT position as superintendent of small mill or carder and spinner in fine yarn mill. Have 20 years' experience on both combed and carded work and can furnish best of references. Age 34. At present employed. Address No. 2212.

WANT position as superintendent. Would consider position anywhere

Thursday, July 25, 1918.

in South, but prefer mills that operate only on day run. Can furnish best of references. Address No. 2213.

WANT position as master mechanic, chief engineer or head electrician in large textile plant. Age 41 years; practical experience, also textile training. Now employed as master mechanic in large mill. Married, good habits. Address No. 2214.

WANT position as superintendent or manager. Have had experience in both positions and have always made good. Can give present and former employers as references. Address No. 2215.

WANT position as superintendent. Am now employed as superintendent and giving entire satisfaction, but wish to change to larger mill. Have successfully handled large mills in past. Address 2216.

WANT position as overseer of weaving. Young man, 28 years of age, a hustler and production specialist, desires position as overseer of weaving. Graduate of Philadelphia Textile School in 1909, eight years' practical mill experience as weaver, warp settler, loom fixer to foreman. Married and in class 4 in draft. A-1 references. Address No. 2217.

WANT position as superintendent or overseer of large card room. Have had long practical experience both on hosiery yarns and weaving yarns and can furnish high class references from former and present employers. Address No. 2226.

WANT position as superintendent of small mill or overseer of spinning in large mill. Am now employed as carder and spinner and can furnish good references from present employers. Held present position 4 years. Address No. 2228.

WANT position as engineer, master mechanic or electrician. Have 22 years experience in steam, water and electric work in cotton mills and can furnish high class references. Address No. 2225.

WANT position as superintendent of yarn mill, prefer Piedmont section. 10 years experience as overseer of carding, spooling and warping. 18 months as assistant superintendent. Age 36, married. Good references. Address No. 2218.

WANT position as superintendent or carder and spinner. Long experience in all three positions and can furnish high class references from former employers. Address No. 2222.

WANT position with executive department of cotton mills, by high grade man of long experience as manager-treasurer, understanding thoroughly manufacturing details. Have always been able to operate plans full with ample help. Want position with responsibility. Address No. 2225.

Thursday, July 25, 1918.
